FOR IMMEDIATE RELEASE

Kwikset Corporation Selects L.K. Machinery, Inc

Holland, Michigan, July 10, 2007 — L.K. Machinery, Inc today announced that Kwikset Corporation has selected L.K. Machinery to provide four of its new DC88 Hot Chamber Die Casting machines, equipped with the Quantum Super Shot System (QS³)™.

About QS³

The QS³ Shot System features the following advantages:

- Real-time Closed Loop Control
- Multiple Velocity Profile Adjustment
- Active Shot Deceleration
- Optimized Cycle Time
- Reduced rejects, die wear and flash

The QS³ shot system is an example of L.K.'s ability to incorporate the latest technology - Moog Servo Valve and high speed computer controls - to achieve high levels of shot system control and performance.

"In the USA, L.K. continues to offer the latest technology to improve the competitive position of our customers," says Bill Damian, President of L.K. Machinery, Inc. "The collaboration of our Customers and our Research & Development group helped us develop this, and a number of other products, with the right level of technology while keeping the machine simple, easy to use, and economical. The new QS³ Hot Chamber shot system greatly increases control capability, allowing flash-free parts to be cast on a consistent basis."

About L.K. Machinery Inc:

At L.K., we recognize Value, Performance and Reliability are essential for improving your bottom line. Our Quantum line of die casting machines, designed for the North American market, uses locally available electric and hydraulic components. Every machine we build for you will meet your strictest performance requirements and safety standards. You can learn more about LK in addition to the products and services we offer at www.LKadvantage.com.

L.K. Machinery, Inc.'s is a member of the L.K. Group, which is now the largest producer of die casting machines in the world, is present in over 28 countries, and is a leader in die casting, injection molding, and CNC technology.
